

Amendments to the Claims

1. (Currently amended): A method for preparing ~~an~~ a condensation aerosol of particles having a mass median aerodynamic diameter of less than 0.1 μm comprising the steps of
- a) depositing a ~~compound-composition~~ drug on a substrate
 - b) heating said substrate to form a vapor of at least a portion of the drug ~~composition~~
 - c) mixing the resulting vapor with a gas, in a ratio to form ~~an~~ a condensation aerosol with a mass median aerodynamic diameter of less than 0.1 μm when a stable number concentration of particles in the gas is reached.
